3M, DuPont defeat class suit over forever chemicals

A US appeals court handed 3M, Corteva Inc subsidiary E.I. du Pont de Nemours and Co and others of toxic so-called "forever chemicals" a big win in their fight against legal liability for the substances, rejecting a lower court's ruling that would have allowed about 11.8 million Ohio residents to sue the companies as a group. The court found that lead plaintiff Kevin Hardwick filed too broad a complaint against the manufacturers, and had not shown per- and polyfluoroalkyl substances found in his body could be traced directly to defendants. The appeals court instructed the lower court to dismiss Hardwick's lawsuit. REUTERS

US Thanksgiving weekend sales hit record \$38 billion

Deep discounts on beauty products and toys to electronics during the Thanksgiving weekend enticed US shoppers to splurge about \$38 billion online, signaling a strong holiday shopping season. Online consumer spending jumped 7.8 per cent during Cyber Week, according to data from Adobe Analytics, outstripping initial expectations for a 5.4 per cent rise. REUTERS

POWER SAVE MODE. Poor show reinforces Disney's decision to exit Indian market

Ayushi Kar
Mumbai

Losses widened for Disney+Hotstar streaming services, which incurred a loss of ₹748.34 crore in FY23 compared with a loss of ₹343.16 crore in the previous financial year, a 118 per cent spurt.

The data was fetched from the MCA filings of Novi Digital Entertainment, the company that owns, operates, and manages Star India's streaming platform Disney+ Hotstar Inc. Disney+ Hotstar reported a total turnover of ₹4,340.79 crore for 2022-23.

The platform's revenue from operations increased 34.79 per cent compared with ₹3,220.41 crore in the previous financial year.

REVENUE GROWTH
Revenue growth has also slowed down; the OTT

company reported a 91 per cent year-on-year increase in turnover in FY22.

AD REVENUE
Going by the company's financial data accessed by business intelligence platform Tofler, the streaming platform's advertisement

revenue for FY23 grew 17.25 per cent to ₹1,974.80 crore in FY23 compared with ₹1,684.31 crore in the previous fiscal.

This shows a marked slowdown in growth, given the fact streaming services reported 2x growth in ad revenues in FY22.

This clearly illustrates that the ad environment for streaming companies is worsening as the company lost prime content properties such as the Indian Premier League to Viacom18-owned JioCinema only in FY24.

SUBSCRIPTION REVENUE
Disney+Hotstar's subscription revenue increased 49.32 per cent to ₹2,051.03 crore for the fiscal ended March 31, 2023, against ₹1,373.61 crore in the previous fiscal.

The revenue from licensing content rights grew 93.83 per cent to ₹314.96 crore compared with ₹162.49 crore in FY22.

Disney+Hotstar's poor financial performance once again underscores why Disney wishes to consolidate and exit the Indian market.

Disney is in discussion with Reliance, and perhaps even Sony for a possible merger.

India IT spending to rise 11% to \$124.6 billion in 2024: Report

Our Bureau
Bangalore

India's IT spending is projected to total \$124.6 billion in 2024, an increase of 10.7 per cent from 2023, according to the latest forecast by Gartner, Inc.

Spending on software and IT services is projected to experience the highest annual growth rates in 2024 in India, with software spending expected to increase by 18.5 per cent and IT services forecast to grow by 14.6 per cent.

DEVICE SPENDING
Despite facing a sluggish phase in 2022 and 2023, primarily due to inflationary pressures, device spending in India is projected to witness a strong resurgence in 2024, growing 10.1 per cent year-over-year.

"The double-digit growth can be attributed to consumers' willingness to pay a higher price for a better experience when upgrading to new smartphones," said Naveen Mishra, VP, Team Manager at Gartner.

While investments in artificial intelligence and generative AI (GenAI) will contribute to IT spending growth, their im-

pacts on IT spending levels will not be evident until 2025.

INVESTMENTS IN AI

"Indian organisations are expected to make investments in AI and automation as a strategic effort to improve operational efficiency and address the ongoing shortage of IT talent. However, it is not until 2025 that GenAI will begin to carve its place in IT budgeting amongst Indian organisations," said Mishra.

In the future, as GenAI continues to present unique opportunities for organisations and become part of IT budgets, CIOs and IT leaders must define their organisation's AI

ambition by examining the opportunities and risks of using GenAI in four areas: the back office, the front office, new products and services, and new core capabilities.

Additionally, CIOs and IT leaders must be able to navigate decisions about AI within their organisations by having light-house principles — a vision for AI that lights the way and says what kind of human-machine relationships they will and will not accept, noted the report.

To facilitate swift and safe adoption of generative AI in the next 12 months, organisations must establish AI-ready principles, make data AI-ready, and implement AI-ready security.
